An endangered species is a type of organism that is threatened by extinction. Species become endangered for two main reasons: loss of habitat and loss of genetic variation. Loss of

Download Free An Endangered Species

Habitat. A loss of habitat can happen naturally.

Dinosaur s, for instance, lost their habitat about 65 million years ago.

National Geographic Society*

Download Free An Endangered Species

An endangered species is a species that is very likely to become extinct in the near future, either worldwide or in a particular political jurisdiction.

Endangered species may be at risk due to factors such as

Download Free An Endangered Species

habitat loss, poaching and
invasive species. The
International Union for
Conservation of Nature Red
List lists the global
conservation status of many
species, and various other
agencies assess the status

Scientists tell us the best way to protect endangered species is to protect the special places where they live. Wildlife must have places to find food, shelter and raise their young.

Download Free An Endangered Species

Logging, oil and gas drilling, over-grazing and development all result habitat destruction.

Endangered species habitat should be protected and these impacts minimized.

The eastern massasauga (Sistrurus catenatus) is a candidate for protection under the Endangered Species Act. Massasaugas are small venomous snakes with thick bodies, heart-shaped heads

Download Free An Endangered Species

and vertical pupils.

Populations of this snake have declined so much that it is now necessary to work to conserve it or it could go extinct in the future.
