850 SHP turboprop offers noise reduction. increased cruise speed. GE Aviation has received EASA type certification for its H85-200 engine on Aircraft Industries' L 410 NG commuter aircraft. The H85-200 turboprop engine, rated at 850 SHP, features an advanced reduction gearbox which lowers maximum propeller speed from 2,080 RMP to 1,950 RMP, resulting in external and internal noise reduction.

OSHKOSH, WI -- GE Aviation is launching two derivative engines of its recently certified H80 engine: the H75 and H85 turboprop engines. The H75 engine will be rated at 750 shaft horsepower (shp) for takeoff and maximum continuous operation, and the H85 engine will be rated at 850 shp. Like the H80, the H75 and H85 engines will be aimed at the agricultural, commuter, utility and business turboprop aircraft segments.
