When it comes to JavaScript (and more specifically Node.js), it also depends on factors such as which server you 're choosing and whether it already provides OAuth2 support. It 's also important to consider the maturity of the project, docs, and community. With that in mind, node-oauth2-server comes to the rescue. It is a

Firstly, we will create the OAuth request by creating HTTP headers and a request body. Then, we will send the request to `https://account.api.twitter.com/1/oauth2/token`. The example code below uses OAuth-1.0a which is a node package that helps us to construct the headers required to make an OAuth request.
