This dualistic focus is responsible for the emergence of mental as well as physical health concerns (Turner 2004). Contemporary studies show that religion is positively associated with physical and mental health, as well as longevity and mortality (Hummer et al. 1999; Sherkat & Ellison 1999). Religious involvement, measured by attendance at services and feelings of religiosity, is positively associated with physical health, general happiness, and satisfaction, as well as being inversely ...

religion can protect and promote a healthy lifestyle), social support (people can experience social contact with co-religionists and have a web of social relations that can help and protect whenever the case), psychological states (religious people can experience a better mental health, more positive psychological ...

~~The Influence of Religion on Health - Inquiries Journal~~
Abstract. Religion and spirituality have been linked to medicine and to healing for centuries. However, in the early 1900's the Flexner report noted that there was no place for religion in medicine; that medicine was strictly a scientific field, not a theological or philosophical one. In the mid to the latter 1900's there were several lay movements that started
