The SC-17 coiled cord enables speedlights to be used up to one and one-half meters from the camera, with automatic shutter speed and ready-light

indication in the viewfinder, just as if the flash unit were mounted directly on the camera. It is also necessary when using the SB-50DX, SB-23, SB-22s, SB-22, SB-21B, SB-20 or SB-15 as a master flash unit, or when using the SB-11, SB-14 and SB-140 as a master flash unit with TTL Remote Cord SC-23, because none of these units have a TTL multiple ...

Nikon SC-17 TTL Cord (Flash To ISO) at KEH Camera

The incorporation of a front-mounted light sensor, the Nikon Speedlight SB-15/SB-17 is also compatible with all other Nikon cameras for automatic, but not through-the-lens, or manual flash output control (Direct attachment via sync cord or by means of flash coupler). Through the use of a silicon-controlled rectifier and series circuitry, the SB-15/SB-17 is able to conserve energy when shooting subjects at close range in automatic mode; thus recycling times are shorter and the number of ...

Nikon SB-15/17 - Instruction Manual

A feature available in some flash units that fires the flash many times while the shutter is open, during a brief exposure, producing a strobe-light effect. In this mode, the photographer can control the flash output, number of times the flash fires, and how often the flash fires.

Nikon Camera Flashes - eBay

Then about 2009, Nikon got the idea to allow Auto ISO to go high with TTL flash, first on the D300S. Actually, the camera meters the ambient to set whatever high ISO the ambient needs. I think this change may be related to the concept of balanced flash, TTL BL, which is the Nikon default, with the flash to become fill flash then.
