C# - What is OOP?

OOP stands for  
Object-Oriented

Programming.

Procedural

programming is about  
writing procedures or  
methods that perform  
operations on the  
data, while object-  
oriented programming  
is about creating  
objects that contain

# Download Ebook Object

both data and methods. Object-oriented programming has several advantages over procedural programming:

Object-Oriented  
Programming In C++  
By Robert  
Laforte  
Edition

Object-oriented programming revolves around data. The main programming unit of OOP is the object. An object is a representation of a real-time entity and consists of data and methods or functions that operate on data.
