Hardware Overview. Let's go over some of the most noticeable differences between the Raspberry Pi Zero (and Pi Zero W) and the Raspberry Pi 3. Both boards are identical in features except that the W has built in Wifi and Bluetooth. Getting started with the Pi Zero board can be a little more cumbersome than with the Pi 3 because many of the

Raspberry Pi Hardware

The Raspberry Pi has three types of serial interface on the GPIO header. You're probably already familiar with the UART serial port, which allows you to open a login session from a serial terminal application, such as PuTTY. The other two serial interfaces are the Serial Peripheral Interface (SPI) and Inter-Integrated-Circuit bus
