## Some Fixed Point Theorems In Fuzzy N Normed Spaces

Eventually, you will completely discover a supplementary experience and success by spending more cash. still when? attain you receive that you require to get those every needs considering having significantly cash? Why don't you try to get something basic in the beginning? That's something that will guide you to comprehend even more roughly speaking the globe, experience, some places, past history, amusement, and a lot more?

It is your definitely own grow old to performance reviewing habit. along with guides you could enjoy now is **some fixed point theorems in fuzzy n normed spaces** below.

The two most important results in fixed point theory, are without contest, the Banach contraction principle (BCP for short) and Tarski's fixed point theorem. Since their appearances, they were subject of many generalizations, either by extending the contractive condition for the B.C.P., or changing the structure of the space itself.

## Some Common Fixed Point Theorems in Partially Ordered Sets

Theorem 2.2: let  $(X, \phi)$  be any  $\phi$ -metric space and  $f: X \rightarrow X$  be continuous. Assume that  $(\phi(f(x), y)) < \max\{(\phi(x, y)), (\phi(x, f(x))), (\phi(y, f(y)))\}$  whenever  $(x, y) \neq 0$ . Then  $f$  has a unique coincidence point whenever  $\text{cl } O(x)$  is nonempty for some  $x$ . Proof: Write  $V(x) = (x, f(x))$ ,  $Z = \{x / V(x) = 0\}$ ;  $O(x) = \{f^n(x) / n \geq 0\}$ . Since  $f$  is continuous,  $V$  is continuous. If  $x \in Z$ , then  $f(x) = x$ .

Some Fixed Point Theorems in Extended b-Metric Spaces 77

(1) If  $\{x_n\}_{n=1}^{\infty}$  is a sequence in  $X$  such that  $\phi(x_n, x_{n+1}) \leq 1$  and  $x_n \rightarrow x$  as  $n \rightarrow \infty$ , then

## (PDF) Some fixed point theorems in extended b-metric spaces

Introduction. We wish to summarize here some new asymptotic fixed point theorems. By an asymptotic fixed point theorem we mean roughly a theorem in functional analysis in which the existence of fixed points of a map  $f$  is proved with the aid of assumptions on the iterates  $f^n$  of  $f$ . Such theorems have proved of use in the theory of ordinary and functional differential equations (see [7], [8], [9] ...

## [PDF] Some fixed point theorems | Semantic Scholar

In the following theorem we are concerned with the continuity of the fixed point. Theorem 1.2. Let  $E$  be a complete metric space, and let  $T$  and  $T_n (n = 1, 2, \dots)$  be contraction mappings of  $E$  into itself with the same Lipschitz constant  $K < 1$ , and with fixed points  $u$  and  $u_n$  respectively. Suppose that  $\lim_{n \rightarrow \infty} T_n x = Tx$  for every  $x \in E$ . Then  $\lim_{n \rightarrow \infty} u_n = u$ .

## Lectures On Some Fixed Point Theorems Of Functional Analysis

In 2012, Wardowski [ 11] introduce a new type of contractions called  $F$  -contraction and prove a new fixed point theorem concerning  $F$  -contractions. In this way, Wardowski [ 11] generalized the Banach contraction principle in a different manner from the well-known results from the literature. Wardowski defined the  $F$  -contraction as follows.

...

Many fixed point theorems have been proved by various authors as generalizations of the Nadler's theorem (see [6–9]). One of the general fixed point theorems for a generalized multivalued mappings appears in . The following result is a generalization of Nadler . Theorem 1.4.

### Some Suzuki-type fixed point theorems for generalized ...

Existence of fixed points in partially ordered sets has been considered recently in [1], and some generalizations of the result of [1] are given in [2–6]. Also, in [1] some applications to matrix equations are presented, in [3, 4] some applications to periodic boundary value problem and to some particular problems are, respectively, given.

### Some Fixed Point Theorems on Ordered Metric Spaces and ...

Moreover, some fixed point theorems for nonlinear set-valued contraction mappings are presented. View. Show abstract. Fixed point theorems for set-valued mappings in metric and Banach spaces.

In [1], Matthews discussed some properties of convergence of sequences and proved the fixed point theorems for contractive mapping on partial metric spaces: any mapping  $T$  of a complete partial metric space  $(X, d)$  into itself that satisfies, where  $0 < \alpha < 1$ , the inequality  $d(Tx, Ty) \leq \alpha d(x, y) + \beta d(x, Tx) + \gamma d(y, Ty)$ , for all  $x, y \in X$ , has a unique fixed point.

MAPPINGS 457 with contraction constant. If  $F$  satisfies a) for each  $x \in S, y \in F(x) \subseteq S$ , there exists a  $z \in (x, y) \cap S$  with  $F(z) \subseteq S$ , (2.2) b) the mapping  $g : S \rightarrow [0, \infty)$  defined by  $g(x) = d(x, F(x))$  is S.e., (2.3) then  $F$  has a fixed point, that is  $x \in F(x)$  for some  $x \in S$ . We first prove the following lemma which simplifies the proof of Theorem 1. LEMMA.

## SOME FIXED POINT THEOREMS FOR SET VALUED DIRECTIONAL ...

Some fixed-point theorems on locally convex linear topological spaces  $E$ . Tarafdar Let  $(E, T)$  be a locally convex linear Hausdorff topological space. We have proved mainly the following results. (i) Let  $T$  be nonexpansive on a nonempty  $T$ -sequentially complete,  $T$ -bounded, and starshaped subset  $M$  of  $E$  and let

## Some fixed-point theorems on locally convex linear ...

The purpose of this work is to study some properties of "Generating space of  $b$ -quasi-metric family" (simply  $G$   $b_q$ -family) and derive some fixed point theorems using some standard contractions. Presented theorems extend and generalize many well-known results in the literature of fixed point theory.

## Some fixed point theorems in generating space of b-quasi ...

Metric fixed point theory is an essential part of mathematical analysis because of its applications in different areas like variational and linear inequalities, improvement, and approximation theory. The fixed point theorem in metric spaces plays a significant role to construct methods to solve the problems in mathematics and sciences.

## Some Fixed Point Theorems in b-metric Space

**FIXED POINT THEOREMS** Fixed point theorems concern maps  $f$  of a set  $X$  into itself that, under certain conditions, admit a fixed point, that is, a point  $x \in X$  such that  $f(x) = x$ . The knowledge of the existence of fixed points has relevant applications in many branches of analysis and topology.
