A pump is a device that moves fluids (liquids or gases), or sometimes slurries, by mechanical action, typically converted from electrical energy into Hydraulic energy. Pumps can be classified into three major groups according to the method they use to move the fluid: direct lift, displacement, and gravity pumps. Pumps operate by some mechanism (typically reciprocating or rotary), and consume ...

Con Edison's Steam Operations. Con Edison's Steam Operations are a district heating system which takes steam produced by steam generating stations and carries it under the streets of Manhattan to heat and cool buildings and businesses in Manhattan. Some New York businesses and facilities also use the steam for cleaning and disinfection.

Jump! Jump! is a score based platformer game. The purpose of the game is to escape from the flooding water coming from under and try to reach the best score. In the game, except water, there is two obstacles: moving barriers that are coming from left and right sides of screen and you should jump before the barriers are closing the path.
